goHAPI™

Honeywell

Dot Matrix MMI

User Interface
Heating Appliances
Electronics platform

goHAPI™

Dot Matrix Display Honeywell Advanced Programmable Interface

A menu driven MMI, based on dot matrix technology. Easy customisable through keypad buttons matrix, for several different types of applications (boilers, renewables, cascading systems, etc.)

Product Description

goHAPI™ is an appliance user interface with on board self diagnostic/service capability.

This MMI can be used in conjunction with existing esys, **neXsys**, **maXsys™** boiler controllers and HPC-r (heat pumps) appliance controller.

Key features

- Easily customisable graphic user interface
- Direct access to appliance functionalities via contextual keys
- Easy configuration via **goHAPI™** online interface
- Time programmes enabled via internal real time clock
- Password protected installer menu
- Multipurpose high and low voltage inputs
- ModBus and OpenTherm enabled
- Different languages supported

Key benefits

- Higher appliance value perception by end user and reduced service costs through intuitive troubleshooting interface
- Faster and direct access to appliance through up to 12 customisable rubber keypads
- Speed up design – faster time to market through **goHAPI™** online interface
- Customisable to user need through time programmes
- Different access levels through password protection
- Increased system flexibility thanks to additional I/Os
- Perfectly suited to integrate your appliance into Building Management Systems
- Deployable for various countries

goHAPI™ Display

Winter mode

Summer mode

Holiday mode

End User
Technician Mode

goHAPI™ Target Applications

Hybrid systems, heat pumps, residential & commercial boilers, cascading systems, fuel cells, mCHPs, ovens.

goHAPI™ is designed to be directly integrated within an OEM's custom appliance control panel or can be provided with its standard housing and keys.

goHAPI™ can be used both as:

- Local User Interface
- Remote User Interface

Menu Screens

goHAPI™ Technical Specifications

- Integrated cascading logic/connectivity (with cascade sensor input)
- PWM for modulating pump
- OTC Interface
- High and low voltage programmable Inputs
- 2 freely programmable relays
- 0-10V interface
- Real time clock functionality
- OpenTherm 3.0 standard interface
- ModBus embedded

Customisable Rubber Key pads
